OFFICIAL MOVEMENT RESTRICTION ORDER 131215A

Date of Movement Restriction: 03-12-2015

Reason for Movement Restriction: Highly Pathogenic Avian Influenza Case Confirmed in Missouri

Now on this 12th day of March, 2015, the Kansas Animal Health Commissioner has determined that there is good reason to believe that movement restrictions are needed to protect the health of domestic animals of the state. This determination is based on a confirmed highly pathogenic avian influenza (HPAI) case near in the Kansas boarder in Jasper county Missouri.

A three kilometer infected zone and a seven kilometer buffer zone around the infected premises defined as the ten kilometer control zone and quarantine area have been put in place in Crawford and Cherokee counties within the state of Kansas.

IT IS HEREBY ORDERED, pursuant to K.S.A. 47-610 *et seq.*, that, until further notice, the transportation of all HPAI susceptible livestock, including live poultry and poultry products (including eggs), into or out of the designated control zone within Cherokee and Crawford counties in Kansas is prohibited unless authorized by an official permit. Poultry and poultry products, including eggs, within the control zone shall not be transported without first receiving an official permit. Permits issued by the Missouri Department of Agriculture Animal Health Division for the movement of poultry or poultry products, including eggs, from the control area in Missouri into Kansas will be accepted.

This Order shall be in effect until further notice, for a minimum of 30 days.

If you have any questions regarding this order, please contact the Kansas Department of Agriculture Division of Animal Health at 785-564-6601.

IT IS SO ORDERED.

William L. Brown

William L. Brown, DVM
Kansas Animal Health Commissioner
